Name	Cao Guohui		
Post	Professor, graduate supervisor		
Academic career	Structural Engineering	Hunan University	2002-2007
	Structural Engineering	Hunan University	1997-2000
	Industrial and Civil Architecture major	Hunan Urban Construction College	1990-1993
Employment	Position	Employer	Period
	Teaching assistant	Hunan Urban Construction College	1993-1997
	Chief Engineer	Guangzhou Liwan District Housing Safety Appraisal Institute	2000-2002
	Director of the Laboratory, Vice Dean of the School of Civil Engineering	Hunan City University	2002-2012
	Dean of the School of Civil Engineering	Hunan City University	From 2013 to the present
Research and development projects over the last 5 years	<p>Project Name (Number), Funding Organization, Project Amount, Project Execution Time, Role (Principal Investigator or Participant)</p> <p>1. Research on the Long - term Mechanical Properties of Steel - All - Light Shale Ceramsite Concrete Composite Beams under the Coupling Action of Stud Corrosion and Load (52278174), funded by the National Natural Science Foundation of China, with a project amount of 540,000 yuan. The project execution time is from 2023 to 2026. The project is in progress, and I am the principal investigator.</p> <p>2. Research on the Corrosion Mechanism of Reinforced Concrete Columns under Load (2021JJ50139), funded by the Natural Science Foundation of Hunan Province. The project amount is 50,000 yuan, and the project execution time is from 2021 to 2023. The project has been completed, and I served as the project leader.</p>

Academic career	Major in Traffic Civil Engineering (Bachelor's degree)	Hunan University of Science and Technology	1998-2002
	Major in Bridge and Tunnel Engineering (Master's degree)	Changsha University of Science and Technology	2003-2006
	Major in Civil Engineering (Doctor's degree)	Central South University	2009-2014-
Employment	Lecturer	Hohhot Vocational College	2006-2009
	Lecturer	Hunan City University	From 2015 to the present
Research and development projects over the last 5 years	<p>1. High-precision Nonlinear Finite Element Analysis Method for Overheight Vehicles Impacting Overhead Bridges (Research project at department and bureau level, in charge, 10,000 yuan, 2016 - 2019)</p> <p>2. Nonlinear Finite Element Analysis Method for the Mechanical Properties of Partially Filled Circular Concrete - Filled Steel Tubular Bridge Piers with Ribs (Research project at department and bureau level, in charge, 15,000 yuan, 2021 - 2024)</p>		
Industry collaborations over the last 5 years	Bridge Engineering (I), Bridge Engineering (II), Bridge Wind and Earthquake Resistance, Introduction to Earthquake Engineering, Introduction to Civil Engineering		
Patents and proprietary rights	A kind of shock - absorbing and energy - dissipating prefabricated rocking bridge pier component (ZL 2022 2 0742773.7)	Zhou Yanqun, Huang Guoping, Li Miao, Yang Rihua	2022.07
Important publications over the last 5 years	<p>1、 Yanqun ZHOU. Experiment on Seismic Behavior of Neotype Column-slab High Piers . Journal of Physics: Conference Series 2020,24(3)</p> <p>2、周雁群、李苗. 往复荷载下钢筋混凝土柱滞回性能的数值模拟. 科技信息.2020,12(2)</p>		

	3、Wenyu xu Yanqun Zhou . Calculation of bridge seismic dynamic reliability based on seismic vulnerability. WOP in Engineering and Science Research.2022,通讯作者 (ISTP)
Activities in specialist bodies over the last 5 years
